ABOUT ME

PM with 4+ years in Web3/Blockchain

Launched products on TON from scratch: from idea to 10,000 active users and 20+ partnerships. Led delivery teams, conducted discovery with clients, built tokenomics and growth strategies. Looking for a Product Manager role at a Web3 company with real product impact.

WORK EXPERIENCE

Web3 Analyst & PM, Oqtacore [discovery, delivery, account]

april 2025 – march 2026

- Discovery with **13 clients**: business goals, audience, risks, constraints - 5 out of 13 reached a signed contract.
- Led delivery of a mining monitoring platform (**\$400.000+**): 7 developers + 1 designer, 3 demo milestones, testing instructions.
- Wrote estimates, roadmaps, user stories for projects in DeFi, RWA, AI, mining.
- Contributed to DeFi protocol development (Ethereum, Solana): requirements definition, technical documentation, functional testing of smart contracts and user flows.
- Account management for 4 projects: synced team with client goals, **3 successful upsells**.

Founder / Product Manager, Magic Pot (TON)

april 2024 – march 2025

- Built a fully decentralized MVP - Telegram Mini App with smart contract; t.me/themagicpot - attracted **9,680 users** (MAU ≈ 1,000).
- Managed a cross-functional team (frontend, backend, smart contracts, DevOps, design); closed 2 replacements in one week without shifting the sprint.
- Simplified UX to 2 clicks → **40% of users** in partner chats participated in token games..
- Signed **20+ partnerships** with TON crypto community leaders; each partnership gave **+50% MAU**.
- Completed TON Ecosystem accelerator: English-language pitch deck, public presentation - **\$5,000 grant**.
- Full cycle (hiring, documentation, MVP, smart contract) within a \$15,000 budget in **7 months**.

Researcher, Analyst, Product (freelance)

december 2021 – march 2024

- Analytical dashboards in Dune Analytics: trading volumes, holder dynamics, key metrics - [example](#)).
- Tokenomics and technical documentation for 4 Web3 projects: vesting, utility token, incentive mechanisms.
- Research and activity participation across L1/L2: TON, Ethereum, Berachain, Oasys, Solana, Avalanche, BSC, Arbitrum, Polygon. - Research and activity participation across L1/L2: TON, Ethereum, Berachain, Oasys, Solana, Avalanche, BSC, Arbitrum, Polygon..
- Launched the Nomuneko memecoin in the Oasys ecosystem.

Business Developer, GGEM Launcher

august 2022 – march 2024

- [30+ partnerships](#) with GameFi projects; negotiations, terms, long-term collaborations.
- White paper: project architecture, economic model, user scenarios.
- Tokenomics: token distribution, demand incentive mechanisms, vesting schedules.

PET PROJECTS

AI Job Search Agent (Claude Code)

march 2026 – june 2026

- Built a multi-agent pipeline that collects vacancies from Telegram channels, scores match against a candidate profile via LLM, and generates tailored CVs and outreach messages automatically.
- Designed the full architecture: Telegram parser (Telethon) → LLM scorer → status tracker → interview prep generator → correspondence log.
- Outcomes: 0 manual copy-paste from [130+ vacancies processed](#); full pipeline runs in one command.

SKILLS AND TOOLS

Product / Project Management: AARRR, RICE, CJM, JTBD interviews, user stories, roadmaps, Scrum, Kanban, Notion, Jira, prioritization

Blockchain / Crypto: DeFi, tokenomics, NFT, RWA, Layer 1/Layer 2, smart contracts, Dune Analytics

Programming: SQL and Python

AI agents: n8n, AI-agents, Claude Code, automation

Languages: Russian (native), English (B2/Upper-Intermediate)

EDUCATION

Russian State University for the Humanities

Faculty of Archival Studies, Specialist degree
